

Stranded copper litz wire **CLI 200/90**

Picture shows CLI 200/120

Advantages

Insulating varnish basis polyurethane, mod.
Grade 1
TJ min. 130 °C
Solderable

Applications

Stranded radio frequency copper litz wire for the production of coils and windings in the radio frequency range and for general laboratory needs. Please consider the relevant standards.

Approvals

Stranded copper litz wire
CLI 200/90

Electrical data

Type

CLI 200/90

Mechanical data

Type

CLI 200/90

Operating data

Current rating

2.52 A

Environment

Heat resistance

130 °C (KLB)

Insulating varnish

Polyurethane, mod.

Tin-plate

>350 °C

Measures and weights

Eff. cross section

0.707 mm²

Weight

0.20 kg

Subject to change.
